

Anza Electric Cooperative, Inc.

A Touchstone Energy® Cooperative 

Effective 01/01/2024

RATE 10 SCHEDULE A-1 COMMERCIAL < 50kW

TYPE OF SERVICE

Single Phase or Three Phase, 60 Cycle A.C. at available secondary voltage, less than 50kW of demand.

Available to commercial services including lighting and power uses subject to the established rules and regulations of the Cooperative.

A service that has exceeded 50 kW of demand in any single billing cycle will be billed under rate schedule P-1 as applicable. When monthly demand for an individual commercial service has measured less than 50kW for twelve consecutive months it will be eligible to be billed again at this A-1 rate schedule. It shall be the member's responsibility to notify the Cooperative of this twelve-month period.

This Rate does not allow a motor with rated capacity in excess of 7.5 hp without express consent of the Cooperative. If three phase is not available a phase converter may be installed with express consent of the Cooperative prior to installation and at no cost to the Cooperative. At no time shall the combined load of the phase converter and motor exceed the demand of a 7.5 hp motor. Protection of three phase motors and other equipment shall be the responsibility of the consumer. The Cooperative recommends motor savers or other such devices to protect against damage due to single phasing of three phase distribution lines.

RATES

Service Availability Charge	\$38.00
Charge per kWh	\$0.198635
Demand Charge per kW over 10 kW per month	\$11.50

MINIMUM

The monthly minimum charge under the above rate schedule shall be no less than the service availability charge.

BILLING DEMAND

The billing demand shall be the maximum kilowatt demand established for any fifteen-minute period during the billing month and shall be measured by using standard demand and energy equipment for metering.

POWER FACTOR ADJUSTMENT

The member agrees to maintain unity power factor as nearly as possible. The demand charge may be adjusted by 1% for each 1% by which the power factor is more than 5% from unity.

POWER COST ADJUSTMENT CLAUSE

Energy charges may be increased or decreased each month where the purchased power cost varies from the 2022 base rate of \$0.097643 per kWh. This adjustment factor will be uniformly applied to all rate classifications on a per kilowatt-hour basis.
